# eScape Digital Cinema Buyer's Guide

---

Sky Factory's Digital Cinema products, eScape, eSea and SkyV, are sophisticated digital video display systems that are customized for each client. We want the process of ordering and installation to be smooth and simple. This guide will familiarize you with the various options in a step-by-step manner. You will then work directly with one of our Sky Designers to place your order. Depending on the requirements of your installation and choice of options, you may also work with one of our Digital Cinema Technical Engineers during the ordering process.

We highly recommend the involvement of a certified audio-video installer during installation, which typically will also involve the services of a carpenter and electrician. The installation process will be fully explained during the ordering process.

## 6 Step Selection System

**Step 1** Choose size

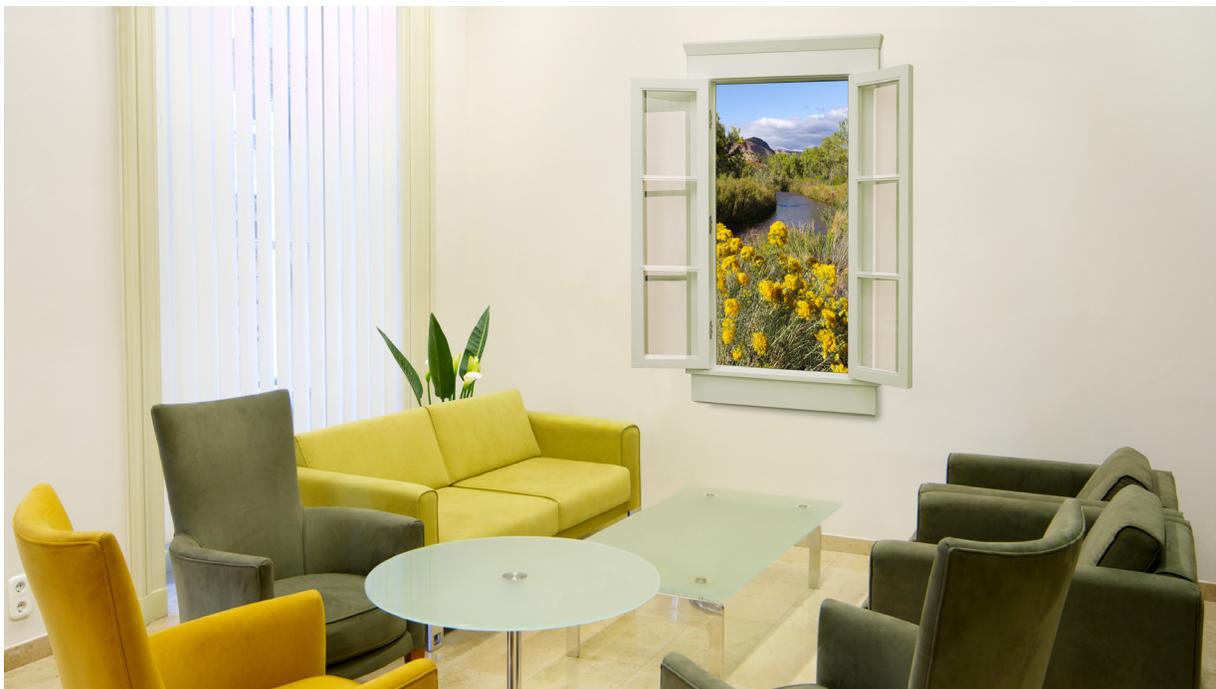

**Step 2** Choose frame style

**Step 3** Choose frame material

**Step 4** Choose the color of the controller

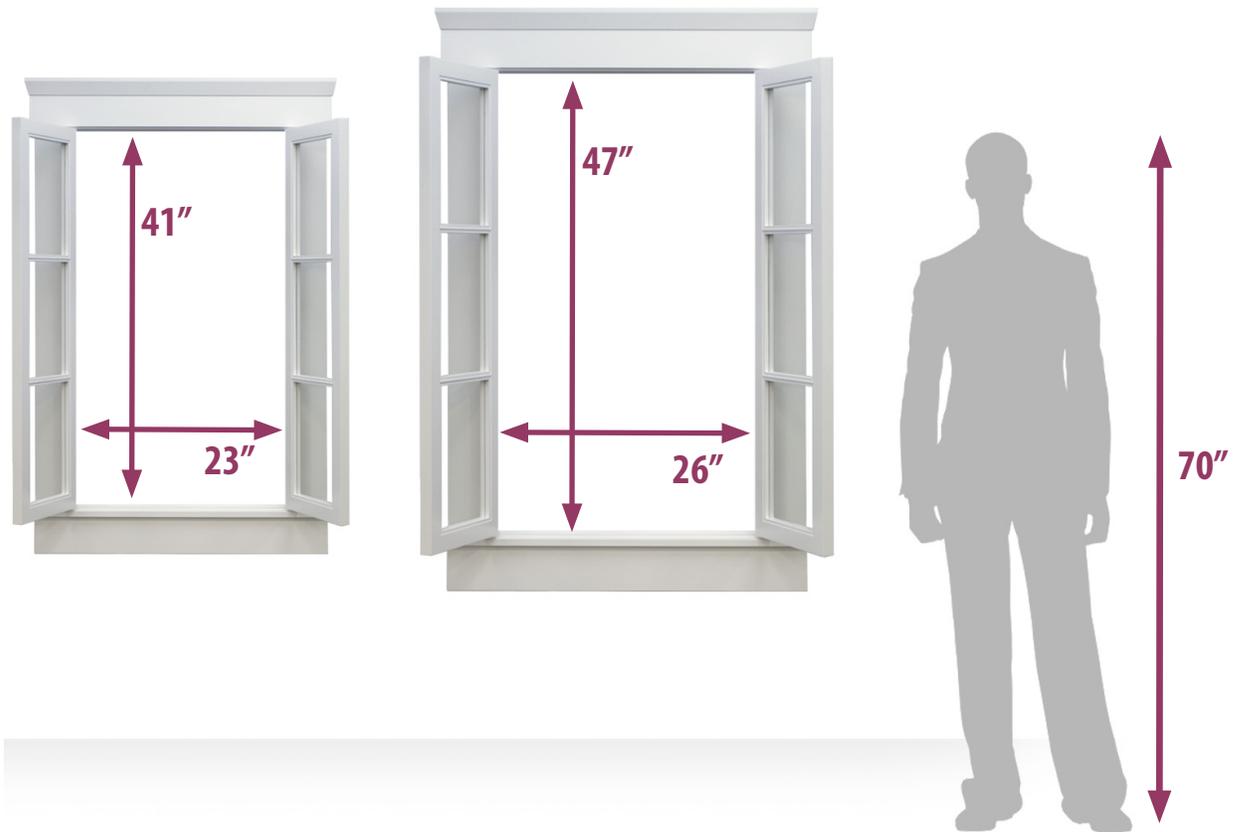

**Step 5** Choose your video and their playback sequence

**Step 6** Call our design staff to review your choices and get a quote

## Step 1 Choose your size

We offer a Model 4123 which has a viewable area of approx. 41" x 23" and a Model 4726 which has a viewable area of approx. 47" x 26", both with a 16 x 9 aspect ratio.

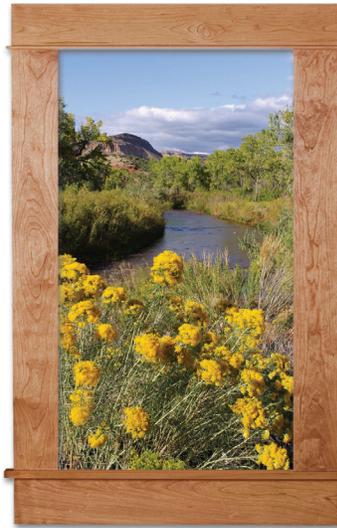

Our commercial grade monitors have full high definition video resolution (1920 x 1080 p) and our videos currently range from 30 to 120 minutes per scene.

## Step 2 Choose your frame style

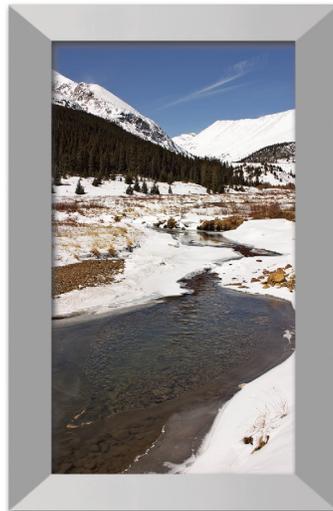

eScape trim comes in a variety of wood species, as well as aluminum. For eScape trim materials, see Step 3.

**Classic**  
using primed  
and painted poplar

**Arts & Crafts**  
using cherry

**Aluminum**  
using brushed  
anodized finish

**Contemporary**  
using walnut

# Step 3 Choose your frame material

Wood trim is finished with a clear, hard, satin lacquer.  
Soft maple is uncoated for those who would like to apply their own stain, or primed for those who would like to paint it.  
Aluminum is provided with either an anodized or powder coated black finish.

## Wood

Cherry

Maple

Pine

Walnut

Red Oak

White Oak

Unfinished Stain Grade Soft Maple\*

White Primed Poplar

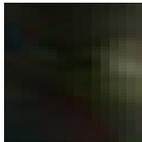

White Painted Poplar

## Aluminum

Brushed Anodized Clear Finish

Brushed Anodized Black Finish

**IMPORTANT:** Wood colors may be different from the samples pictured.  
Do not use samples to match other elements in a building (contact one of our designers).

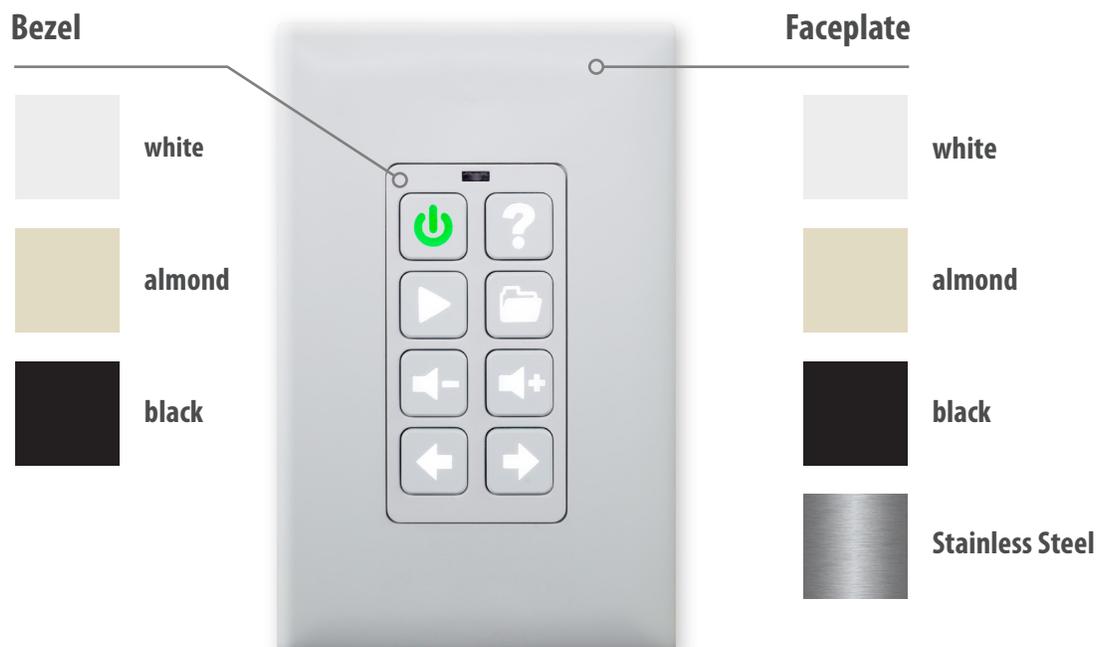

\*Or alternate wood if soft maple not available. For more staining detail, see Appendix A on page 15.

## Step 4 Choose the Colors of the Wall Mounted Controller

The wall mounted controller has three parts: the buttons, the bezel and a Lutron® Designer Style faceplate.

The bezel comes in white, almond or black.

The faceplate comes in white, almond, black or stainless steel.\*

\*Other faceplate options are available from Lutron®

## Step 5 Choose your video scenes

Go to the eScape video catalog page: <http://www.skyfactory.com/products/eScape/>  
Choose your videos, note the video scene ID numbers and their duration, and proceed to Step 6. In Step 6 we ask you to call us to review your selections. Each eScape features 8, 12, or 16 hours of footage, depending on the content package you choose.

The screenshot shows the Sky Factory website interface. At the top, the logo reads "Sky Factory" with the tagline "The vastness of the sky...inside". A navigation bar includes links for HOME, PRODUCTS, PORTFOLIO, SKYMOBILE, RESOURCES, ABOUT US, CONTACT US, and a Facebook Like button with a count of 142. The main content area features a "PRODUCTS" sidebar with links for "eScape", "Overview", "Scene Index", "Buyer's Guide", "Introductory Video", and "Documentation". The central focus is the "eScape™ 2.0" product description, which states it is a digital cinema virtual window bringing nature's beauty to interior environments. Below this is a "Library of Scenes" section for "es2049", which is 79 minutes long. The scene description includes details about the location (Jemez River near Jemez Pueblo, New Mexico) and the visual elements (Chamisa flowers, a river, and mountains). A large window graphic displays the scene, and a vertical strip on the right allows users to "Choose your scene" with a scrollable list of thumbnails. Navigation buttons for "PREVIOUS", "NEXT", and "SCENE INDEX" are located at the bottom of the scene preview area.

## Step 6 Contact a Sky Designer

Contact our design staff to review your selections, get a price quote, and get answers to any questions you may have.

# Appendix A:

## Staining

Unfinished Stain  
Grade Soft Maple

### Staining

Staining wood is most effectively done on-site by a professional woodworker. A professional is familiar with a variety of woods and stains and can provide a range of samples to best match the client's expectations and/or the local decor. Because we cannot effectively do this, we offer a stain grade option: soft maple\*, which receives stain well and is more universal in appearance. The client then has the trim stained on-site to give the desired effect.

If soft maple\* does not meet your needs, contact a Sky Designer to discuss other options.

We always guarantee excellent workmanship and high quality wood in all our options. However, because the variables in staining are so great, we cannot guarantee the final look when choosing the stain option.

\*Or alternate wood if soft maple not available.
